RUNNER-UP

ROUND 1

Warm-Up Rally

QUIZ // 20 QUESTIONS // MIXED CS CONCEPTS // FIXED TIME WINDOW

- All teams start together on the event website; one device and one submission per team.
- Closed-book, no AI, no phones, no messaging apps. No negative marking; answers are final once submitted.
- Ranked by most correct answers, then by earlier server-recorded submission time.

No team is eliminated. Round 1 scores count toward the combined score for Round 3 selection.

ROUND 1 // NO CUT // ALL TEAMS PROCEED

ROUND 2

Bug Bounty

CASE-FILE CHALLENGE // ~10 QUESTIONS // 15 MINUTES

- Written case files: short buggy code snippets, code dry runs and simple architecture questions.
- Basic logic that applies to any language: loops, conditions, arrays, functions.
- Scored out of 100 (10 questions × 10 points, partial credit where marked).
- Combined score = (Round 1 % × 0.4) + (Round 2 % × 0.6).

Tie-break: higher Round 2 → higher Round 1 → Round 2 architecture score → earlier Round 1 submission → sudden-death question.

ROUND 2 // TOP 10 BY COMBINED SCORE ADVANCE

FINAL

Final Build-Off

ARCHITECTURE // DEPLOYMENT // 3-MIN PITCH // 2-MIN JUDGES' Q&A

- Pick one problem statement, draw a high-level architecture and build a static web UI.
- Deploy the static UI on EC2 after a short organizer demo, then pitch with a PPT.
- Scored out of 100: architecture 25, PPT pitch 20, flow understanding (Q&A) 30, live deployment 25.
- At least 2 judges score independently; the average counts. Round 3 is scored separately from Rounds 1 and 2.

EVENT GUIDE

BLUEPRINT TO LIVE // INFORMATION SCIENCE AND ENGINEERING // 24TH OCTOBER 2026

ROUND	TITLE	FORMAT & MECHANICS	OUTCOME
Round 1	Warm-Up Rally	20-question quiz on mixed CS concepts, taken on the event website	All teams proceed
Round 2	Bug Bounty	Written case files, ~10 questions in 15 minutes	Top 10 advance
Round 3	Final Build-Off	Architecture, static UI on EC2, 3-min pitch + 2-min Q&A	Winner + Runner-up

Blueprint to Live

Blueprint to Live takes ISE teams from quiz to debug to design to deploy. It tests core CS concepts, the ability to reason through buggy code and dry runs, and how clearly a team can design, ship and explain a simple system. Teams of 2–3 members compete across three rounds, and the final is scored on its own.

QUICK OVERVIEW // THE FLOW

80 participants · 2–3 members per team · 3 rounds · ~30 teams → top 10 → 2

Outcome: Winner + Runner-up

EVENT ROUNDS

Round 1 — Warm-Up Rally

- 20 quiz questions, closed-book, one device per team.
- Ranked by correct answers, then earlier submission time.

NO ELIMINATION — ALL TEAMS PROCEED

Round 2 — Bug Bounty

- ~10 case-file questions in 15 minutes, 10 points each.
- Top 10 by combined score (R1 × 0.4 + R2 × 0.6) advance.

TOP 10 TEAMS PROCEED · OTHERS ELIMINATED

Round 3 — Final Build-Off

- Architecture 25 · PPT pitch 20 · Q&A 30 · Deployment 25.
- Pitch overrun costs 1 point per 30 seconds, up to 4 points.

HIGHEST SCORE WINS · SECOND HIGHEST IS RUNNER-UP
