AWS STUDENT BUILDER GROUP

Franchise Forge Labs

BUILD // CREATE // INNOVATE

3 HOURS (10 AM - 1 PM) · BEGINNER-FRIENDLY · OCT 5-6, 2026

Welcome to Franchise Forge

AWS SBG INTRO → FRANCHISE FORGE INTRO → CLOUD & AWS BASICS → AWS ACCOUNT SETUP → BEDROCK (GEN AI) → PROMPT ENGINEERING → S3 STUDIO VAULT → FULL WORKFLOW → **READY TO BUILD YOUR FRANCHISE**

PREREQUISITES

Open to all — nothing to install. Just curiosity to learn.

WORKSHOP BRIEF

BEGINNER-FRIENDLY // HANDS-ON // AMAZON BEDROCK & S3

This hands-on workshop introduces participants to Amazon Bedrock, prompt engineering, and AI-assisted creative development, followed by using Amazon S3 to organize and store their project assets. Participants will learn how to turn ideas into structured creative outputs using AI while developing practical skills in prompt design, content generation, AWS workflow, and digital asset management. The workshop prepares participants to confidently build and manage their franchise during the Franchise Forge: The Studio Challenge.

Day 1

SESSION 1

Introduction to AWS SBG

- Introduce the AWS Student Builders Group (SBG) at the college, its purpose, community, activities, and initiatives.
- Explain how students can participate in AWS workshops, projects, technical sessions, and events.

SESSION 2

Introduction to Franchise Forge

- Introduce Franchise Forge: The Studio Challenge and explain the concept behind the event.
- Give participants a high-level overview of the challenge, the role of AWS, and what they will build during the event.

SESSION 3

Introduction to AWS & Cloud Computing

- Introduce AWS and cloud computing, including the basic concept of using cloud infrastructure and services.
- Explain how AWS services can be used to build, store, manage, and deploy applications and digital content.
- Give a brief overview of commonly used AWS services and introduce the services that participants will work with during the workshop.

SESSION 4

Hands-On: Creating & Accessing Your AWS Account

- Guide participants step-by-step through creating their AWS account / AWS Free Plan account, signing in to the AWS Management Console, and completing the initial setup.
- Help participants understand the AWS Console interface, account navigation, region selection, and basic account settings.
- Verify that every participant can successfully access the AWS Console before concluding Day 1.

Day 2

SESSION 5

Amazon Bedrock — Introduction to Generative AI

- Introduce Amazon Bedrock and explain how it provides access to generative AI foundation models.
- Demonstrate the Bedrock interface and explain how participants will use it to generate ideas, stories, characters, and other creative content for their franchise.
- Conduct a small hands-on activity where participants experiment with their first AI prompt.

SESSION 6

Prompt Engineering — From Idea to Output

- Introduce the fundamentals of writing effective prompts for generative AI.
- Demonstrate techniques such as providing context, defining roles, specifying requirements, adding constraints, and refining prompts.
- Participants practice creating and improving prompts that can be used later during the Franchise Forge challenge.

SESSION 7

Amazon S3 — Creating Your Studio Vault

- Introduce Amazon S3 and explain its role as cloud storage for the competition.
- Demonstrate how to create an S3 bucket, understand basic bucket/object concepts, and organize files and folders.
- Participants create their Studio Vault and upload sample franchise assets to understand the workflow they will use during the event.

SESSION 8

Complete Workflow — Bedrock → S3 → Franchise Forge

- Demonstrate the complete workflow participants will follow during the competition: generate content using Bedrock → create/refine assets → organize assets → store them in S3 → prepare them for submission.
- Participants complete a small end-to-end practice task using both Bedrock and S3.
- Explain the event website, submission process, S3 sharing/access requirements, and what participants should have ready before Franchise Forge: The Studio Challenge.

KEY TAKEAWAYS

What You'll Walk Away With

- Understand the AWS ecosystem, cloud computing fundamentals, and the role of AWS services.
- Become familiar with the AWS Management Console, including account access, navigation, and region selection.
- Successfully create and configure an AWS account for participation in the event.
- Understand Amazon Bedrock and how generative AI can be used for creative content development.
- Learn how to use Amazon S3 for cloud-based storage and asset management.

READY TO BUILD YOUR FRANCHISE FORGE ENTRY

Workshop Guide

FRANCHISE FORGE WORKSHOP // DEPARTMENT OF ARTIFICIAL INTELLIGENCE & DATA SCIENCE // OCT 5-6, 2026

SESSION	DAY	TOPIC
1	Day 1	Introduction to AWS SBG
2	Day 1	Introduction to Franchise Forge
3	Day 1	Introduction to AWS & Cloud Computing
4	Day 1	Hands-On: Creating & Accessing Your AWS Account
5	Day 2	Amazon Bedrock — Introduction to Generative AI
6	Day 2	Prompt Engineering — From Idea to Output
7	Day 2	Amazon S3 — Creating Your Studio Vault
8	Day 2	Complete Workflow — Bedrock → S3 → Franchise Forge

Franchise Forge Workshop

This hands-on workshop introduces participants to Amazon Bedrock, prompt engineering, and AI-assisted creative development, followed by using Amazon S3 to organize and store their project assets — building practical skills in prompt design, content generation, AWS workflow, and digital asset management ahead of Franchise Forge: The Studio Challenge.

QUICK OVERVIEW — THE FLOW

3 Hours

8 Sessions

Beginner-Friendly

Certificate Issued

Key Takeaways

Understand the AWS ecosystem, cloud computing fundamentals, and the role of AWS services.

Become familiar with the AWS Management Console, including account access, navigation, and region selection.

Successfully create and configure an AWS account for participation in the event.

Understand Amazon Bedrock and how generative AI can be used for creative content development.

Learn how to use Amazon S3 for cloud-based storage and asset management.
