

DEPARTMENT OF ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING

AWS STUDENT BUILDER GROUP

The Builders Lab

BUILD. DEPLOY. AUTOMATE. INNOVATE WITH AWS.

3 HOURS · BEGINNER-FRIENDLY · 21/09/2026 – 22/09/2026

Welcome to The Builders Lab

WELCOME → CLOUD & AWS → CORE SERVICES → AI/ML → MLOPS → QUIZ → CERTIFICATE

PREREQUISITES

Before You Arrive

- A laptop and charger; running cloud environments can draw significant battery power.
- A solid internet connection to connect securely to institutional or hotspot Wi-Fi.
- An active AWS Account. Participants can sign up for the AWS Free Tier.
- Valid debit/credit card for AWS identity verification; the supplied brief notes a temporary authorization fee of around ₹2 / \$1, instantly refunded.
- Minimum prior knowledge: AWS Console knowledge.

WORKSHOP BRIEF

Cloud Foundations → AI/ML & MLOps

BEGINNER-FRIENDLY // HANDS-ON // AWS

The session covers hands-on basic AWS services on Day 1. On Day 2, participants train a model using Amazon SageMaker Canvas and explore MLOps and Generative AI through AWS services and practical exercises.

DAY 1 – CLOUD & AWS FUNDAMENTALS // CORE SERVICES & AI OVERVIEW

SESSION 01

Welcome & Intro to AWS SBG DBIT

- Introduce the core team and club purpose.
- Set the day's goals and verify Wi-Fi connectivity and account readiness.

SESSION 02

Icebreaker & Settle-In

- Participant interaction, environment setup, and room orientation.

SESSION 03

History of Cloud & AWS

- Explore the evolution of cloud computing and infrastructure basics.
- Understand the renting-versus-buying model and where AWS fits.

SESSION 04

Short Break

- Quick refresher break.

SESSION 05

Hands-On: Core AWS Services

- Navigate the AWS Console, including Search and Regions.
- Guided hands-on walkthrough of IAM, EC2, S3, and core infrastructure.

SESSION 06

AWS AI/ML Overview & SageMaker Canvas

- Introduction to the AWS AI ecosystem, Generative AI, and Amazon Bedrock.
- Understand why MLOps matters and explore visual ML automation using SageMaker Canvas.

SESSION 07

Cost-Control Takedown

- Delete active endpoints, stop Canvas instances, and clear S3 buckets to prevent unexpected bills.

SESSION 08

Feedback, Live Quiz & Closing

- Collect participant thoughts and session feedback.
- Run an interactive quiz testing Day 1 takeaways and distribute prizes to top performers.
- Deliver closing remarks, preview Day 2, and take the group photo.

DAY 2 – MLOPS DEEP DIVE, GENERATIVE AI & HANDS-ON WORKSHOP

SESSION 09

Settle-In & Recap

- Buffer for check-in and late arrivals.
- Quick refresher on Day 1 concepts and core takeaways.

SESSION 10

Bedrock & PartyRock Walkthrough

- Explore foundation models, LLM concepts, tokens, temperature, and system prompts.
- Practice prompt chaining using @ and receive the supplied access code: 948932.

SESSION 11

Hands-On Workshop: MLOps Deep Dive

- Set up an end-to-end MLOps pipeline.
- Explore model deployment workflows and complete practical hands-on exercises.

SESSION 12

The Ultimate MLOps Quiz Battle

- Fast-paced Kahoot/Quizizz quiz covering AWS, S3, SageMaker, and the MLOps lifecycle.

SESSION 13

Resource Teardown & Clean-up

- Teardown active cloud resources, SageMaker models, and sandbox access to avoid lingering charges.

SESSION 14

Feedback, Certificate Distribution & Closing

- Collect formal workshop feedback and distribute digital certificate links.
- Open Q&A, announce future AWS Club tracks, conclude the workshop, and take the core team group photo.

KEY TAKEAWAYS

- Understand and use AWS services effectively.
- Gain practical knowledge of AWS core services and console workflows.
- Understand AWS AI/ML concepts, Generative AI, and MLOps.
- Train a model using Amazon SageMaker Canvas and explore an end-to-end MLOps workflow.
- Leave with broader AWS-related knowledge and a workshop certificate.

WORKSHOP GUIDE

SESSION SUMMARY

SESSION	TOPIC	OUTCOME
01	Welcome & Intro to AWS SBG DBIT	Set goals; verify connectivity and account readiness.
02	Icebreaker & Settle-In	Participant interaction and environment setup.
03	History of Cloud & AWS	Understand cloud evolution, infrastructure basics, and AWS context.
04	Short Break	Quick refresher break.
05	Hands-On: Core AWS Services	Navigate Console; work with IAM, EC2, S3, and core infrastructure.
06	AWS AI/ML Overview & SageMaker Canvas	Explore AWS AI, Bedrock, MLOps, and visual ML automation.
07	Cost-Control Takedown	Clean up endpoints, Canvas instances, and S3 resources.
08	Feedback, Live Quiz & Closing	Collect feedback, test Day 1 takeaways, distribute prizes, preview Day 2, and take the group photo.
09	Settle-In & Recap	Check-in buffer and refresh Day 1 concepts.
10	Bedrock & PartyRock Walkthrough	Explore FMs, LLM concepts, prompting, and prompt chaining.
11	Hands-On Workshop: MLOps Deep Dive	Set up an end-to-end MLOps pipeline and deployment workflow.
12	The Ultimate MLOps Quiz Battle	Check knowledge of AWS, S3, SageMaker, and MLOps lifecycle.
13	Resource Teardown & Clean-up	Remove active resources and sandbox access to avoid charges.
14	Feedback, Certificate Distribution & Closing	Collect formal feedback, distribute certificates, answer questions, conclude, and take the final group photo.

The Builders Lab

The workshop covers hands-on basic AWS services on Day 1 and moves into AI/ML, Generative AI, and MLOps on Day 2. Participants train a model using Amazon SageMaker Canvas and complete practical MLOps exercises while learning how to use AWS services effectively.

QUICK OVERVIEW – THE FLOW

14

SESSION SEGMENTS

CERTIFICATE

ISSUED TO ATTENDEES

KEY TAKEAWAYS

Use AWS services effectively through hands-on practice.

Build familiarity with AWS core services and console navigation.

Understand AI/ML, Generative AI, and MLOps concepts.

Train a model using Amazon SageMaker Canvas.

Explore an end-to-end MLOps pipeline and deployment workflow.

Receive a workshop certificate.
