AWS STUDENT BUILDER GROUP

Fetch N Fix: Spot before it Sparks

ANALYZE // DIAGNOSE // DESIGN // DECIDE

20 TEAMS · MULTI-ROUND TECHNICAL CHALLENGE · 2ND – 6TH NOVEMBER 2026

Welcome to Fetch N Fix

ROUND 1

Diagnosis Sprint

CLUE ANALYSIS // TECHNICAL REASONING

- Identify unusual or critical conditions
- Find relevant patterns and inconsistencies
- Determine possible causes
- Prioritize the identified issues
- Support conclusions with appropriate engineering reasoning

Time Limit: 60 minutes — teams must submit their Analysis Sheet within the allotted time to qualify for Round 2.

60-MINUTE ANALYSIS SHEET DEADLINE → ROUND 2

ROUND 2

Solution Design

END-TO-END TECHNICAL SOLUTION

- Receive additional information about the identified problem
- Develop an end-to-end technical solution: effective information handling, logical identification of critical conditions, intelligent early detection & appropriate response
- Teams are free to determine the most suitable technical approach
- Solution should be practical and scalable

Bottom 50% of teams, based on combined Round 1 + Round 2 scores, are eliminated. Top 50% advance to the Final Pitch.

COMBINED SCORE – BOTTOM 50% ELIMINATED → 10 TEAMS ADVANCE

FINAL ROUND

The Final Pitch

5-6 MINUTE PRESENTATION // PROBLEM → EVIDENCE → DIAGNOSIS → SOLUTION → ACTION

- Present the complete solution to judges, following Problem → Evidence → Diagnosis → Solution → Action
- Conclude with a clear decision connecting the identified problem to a specific technical response and final action

TYPE	POINTS
Analysis Accuracy	30
Solution Logic	25
Practicality	20
Presentation & Clarity	15
Q&A	10
Total	100

WINNING TEAM DETERMINED BY JUDGES' SCORECARD

EVENT GUIDE

FETCH N FIX // ELECTRICAL & ELECTRONICS ENGINEERING // 2ND – 6TH NOVEMBER 2026

ROUND	TITLE	FORMAT & MECHANICS	OUTCOME
Round 1	Diagnosis Sprint	Analyse clues, identify critical conditions & determine causes	Analysis Sheet due @ 60 min
Round 2	Solution Design	Develop an end-to-end technical solution	Bottom 50% eliminated
Final Round	The Final Pitch	5-6 min presentation: Problem → Evidence → Diagnosis → Solution → Action	Scored out of 100

Fetch N Fix

Fetch N Fix is a multi-round technical challenge testing engineering analysis, problem-solving, intelligent solution design and practical decision-making. Teams progressively analyze clues, diagnose the underlying issue, and design an end-to-end technical solution, following the arc Analyze → Diagnose → Design → Decide. The bottom 50% of teams are eliminated after the first two rounds, and the remaining teams pitch their complete solution to a judging panel for a final score out of 100.

QUICK OVERVIEW – THE FLOW

20 Teams Registered 3 Rounds Bottom 50% Eliminated Winner / 100 Pts Judges' scorecard

EVENT ROUNDS

Round 1 — Diagnosis Sprint

- Identify unusual or critical conditions & find patterns
- Determine possible causes & prioritize identified issues

ANALYSIS SHEET DUE @ 60 MIN

Round 2 — Solution Design

- Develop an end-to-end technical solution: information handling, early detection & appropriate response
- Practical, scalable approach — teams choose their own technical direction

TOP 50% ADVANCE (10 TEAMS)

Final Round — The Final Pitch

- Present the complete solution: Problem → Evidence → Diagnosis → Solution → Action
- Conclude with a clear, technically justified final decision

WINNER DETERMINED BY SCORECARD
