

DEPARTMENT OF INFORMATION SCIENCE AND ENGINEERING

AWS STUDENT BUILDER GROUP

Beyond Search: The Intelligence Challenge

100 PARTICIPANTS · TEAM SIZE 2-3 · 24 OCT 2026

Welcome to Beyond Search

100 PARTICIPANTS REGISTERED → 10 TEAMS ADVANCE TO ROUND 2 → 2 WINNER & RUNNER-UP

ROUND 1

Rapid Retrieval Challenge

15 QUESTIONS // EASY-MEDIUM // OWN BEDROCK KNOWLEDGE BASE ONLY

- Teams use only their own Amazon Bedrock Knowledge Base
- 15 retrieval questions, ranging from easy to medium difficulty
- Answers are submitted through the event portal
- Scoring is based on correctness first and submission time second

The top 10 teams on the leaderboard advance to Round 2.

TOP 10 TEAMS ADVANCE

ROUND 2

AWS Solution Architect Challenge

SAME CUSTOMER CASE STUDY // OWN BEDROCK ASSISTANT & KB ONLY // 5 MIN PER TEAM

Deliverables

- AWS architecture diagram
- Selection of suitable AWS services
- Data flow explanation
- Justification for security, scalability, networking, storage and monitoring choices
- Cost-aware architecture wherever applicable

Presentation Format 5 MIN TOTAL

- 3 minutes to present the architecture
- 2 minutes of judge Q&A

TYPE	POINTS
Correct AWS Service Selection	30
Architecture Design	20
Technical Justification	25
AWS Best Practices	15
Presentation & Judge Q&A	10
Total Score	100

Every qualified team receives the same case study. Final ranking is decided by highest overall Round 2 score.

FINAL

Winner & Runner-Up

RANKED BY ROUND 2 SCORE // TIE-BREAKER CHALLENGE IF NEEDED

- Final rankings determined by architecture design, AWS service selection, technical justification and presentation
- The team with the highest overall score is declared the Winner
- The team with the second-highest score is declared the Runner-up
- In case of a tie, a final tie-breaker challenge is conducted

1 2 3 4 5 6 7 8 9 10

WINNER & RUNNER-UP CROWNED

EVENT GUIDE

Beyond Search: The Intelligence Challenge // Information Science & Engineering // 24 Oct 2026

ROUND	TITLE	FORMAT & MECHANICS	OUTCOME
Round 1	Rapid Retrieval Challenge	15 KB-based retrieval questions, scored on correctness then submission time	Top 10 teams advance
Round 2	AWS Solution Architect Challenge	Shared case study; architecture design deliverables + 5-min presentation & judge Q&A	Winner & Runner-up declared

Beyond Search: The Intelligence Challenge

Beyond Search: The Intelligence Challenge tests how well teams can build and reason over their own Amazon Bedrock Knowledge Base — first under a rapid-fire retrieval test, then through a full AWS solution architecture exercise against a real customer case study. It's a two-stage test of both retrieval accuracy and applied cloud architecture skill, judged on correctness, technical justification, and clear communication under time pressure.

QUICK OVERVIEW – THE FLOW

100 PARTICIPANTS → 2 ROUNDS → Winner & Runner Up FINAL OUTCOME

Event Rounds

ROUND 1

Rapid Retrieval Challenge

- Teams use only their own Amazon Bedrock Knowledge Base
- 15 retrieval questions, easy to medium difficulty, submitted via the event portal
- Scored on correctness first, submission time second

TOP 10 TEAMS ADVANCE TO ROUND 2

ROUND 2

AWS Solution Architect Challenge

- Same customer case study for every qualified team — business requirements, scalability, budget, security and availability targets
- Architecture diagram, service selection, data flow and full technical justification, using only their own Bedrock assistant and KB
- 5-minute slot per team: 3 minutes to present, 2 minutes of judge Q&A

WINNER & RUNNER-UP DECLARED
